# KAV Microscopes

We Build Traditional and Digital Microscopes

Ken-A-Vision offers educational solutions with its market-leading EduCam® software. Make learning fun and easy by putting the “iCan” in the classroom. Our dynamic educational software unlocks today’s content and curriculum by broadcasting real-time lessons, images, and student work. Students own their learning experience expressing critical thinking, and demonstrating creativity.

EduCam is maximized for 1:1 and 1:many or “bring your own device” environment. Ideal for all school classroom sets of tablets, smartphones, and computers. Once the image is captured, EduCam app tools annotate, measure, and take a note just to name a few. Create digital content in real time and enable flipped learning.

# Cameras for all of your classrooms

Ken-A-Vision has re-imagined classroom integration and collaboration. Today you should not be tied to a single piece of hardware. Software is today’s sharing medium. Ken-A-Vision delivers on this need with EduCam®. EduCam is the first fully functional collaboration assessment software for visual feedback and sharing.

The choices are endless. From a demonstration scope right for your classroom to a Wi-Fi-enabled visualizer for portability, Ken-A-Vision has the product to match your classroom.
